No Foreign-going Vessel is included which has not been so reported within four years, and no Home Trade Vessel wh has not been reported within one year. It is possible that some Vessels may be included which have ceased to e or are no longer employed as British Vessels, but every endeavour is made to ascertain and strike off such Vessels.

With respect to the Crews, a very small deduction ought to be made for the case of men who join a fresh ship immedia on their discharge from the former one, which happens to remain in Port.

Note.—The decrease in the Number of Persons committed for Trial in England and Wales, since 1855, is partly to be attributed to the operation of the Criminal Justice Act of 1855, which authorizes Justices to pass sentences for short periods, with the consent of the prisoners, instead of committing for Trial to the Sessions.

TO THE RIGHT HONOURABLE THE LORDS OF THE COMMITTEE OF PRIVY COUNCIL FOR TRADE.

My Lords,

I have the honour to submit to your Lordships the Agricultural Returns of Great Britain for the year 1868; collected, as in the previous year, from all Occupiers of Land and Owners of Live Stock. The duty of distributing and collecting Forms for obtaining the requisite information, and of tabulating the same for Counties, was again entrusted to officers of the Inland Revenue Department. The Returns for the year 1867 are also printed in order to afford a comparison of results in the two years.

A Summary of the Returns, so far as related to the Acreage under the chief Corn Crops, Potatoes, and the total number of Cattle and Sheep, was made up at the earliest practicable date, and sent for publication to the London newspapers upon the 19th of September last.

An earlier announcement of the like results could in future be made, should the Forms be sooner returned by the Occupiers of Land to the collecting officers. As the Forms are issued stamped for free transmission by post, a ready means for the early return of the Forms by the Occupiers is afforded by the Post Office. In many cases where the Forms are not so returned, considerable delay is occasioned by the officers having to make personal application at houses situated at some distance from their own residences.

I regret that the Returns in detail have not been issued earlier, but time is required by this Department to complete the grouping into classes of crops, to compute per-centage proportions, and for a careful comparison of relative numbers as a test of accuracy. In

cases of doubt, inquiries have to be addressed to the local officers in different parts of the country.

With respect to the collection of the Returns for the present year, several of the officers employed have reported that the necessary information has been more readily afforded, and that more care has been taken to state the actual Acreage and number of Live Stock.

The practice of entering exact figures in the Forms issued to the Occupiers of Land will, no doubt, become more general year by year as the object and scope of the Returns are better understood.

At present there is reason to believe that the number of Live Stock in some counties is understated, but probably not to any important extent.

The present is the third year as regards the Acreage of Crops, and the second as regards Live Stock, for which the Returns have been collected in Great Britain at the same period of the year.

In the Tables for the present year corrected figures are given for the number of Returns obtained from Occupiers of Land in 1867. As separate Returns are made by occupiers having separate farms in two or more parishes, the number of Returns obtained may be considered as nearly representing the number of separate Occupations or Holdings.

The first two tables show Abstracts of the Agricultural Returns for each Division of the United Kingdom ; the figures for Ireland being taken from the Returns issued by the Registrar General in Dublin.

The total number of acres returned as under all kinds of Crop, Bare Fallow, and Grass in the United Kingdom in 1868 was 45,652,000, which is 265,000 in excess of the total in 1867, and 1,307,000 in excess of the total in 1866. The large increase in 1868 as compared with 1866 is, however, chiefly owing to the increased acreage of permanent pasture returned in Great Britain in 1867 and 1868 under a more comprehensive heading in the Forms used for collecting the Returns.

Of the total number of 45,652,000 acres, returned for the United Kingdom in 1868, 11,659,000 were under Corn Crops; 4,865,000 under Green Crops; 984,000 were under Bare Fallow; 5,690,000 under Clover and other Rotation Grasses; and 22,164,000, or nearly one half of the Total Acreage returned, were under Permanent Pasture.

The proportion of Permanent Pasture varies considerably in the different divisions of the kingdom. The Abstract Tables show that the proportion of Permanent Pasture to the Total Acreage returned was 48 in every 100 acres in the United Kingdom, 42 in England, 56 in Wales, 23 in Scotland, and 64 in Ireland.

The Acreage returned in 1868 as under Bare Fallow or uncropped Arable Land amounts to 958,000 acres for Great Britain, and to 24,000 acres for Ireland. In Great Britain the proportion of Bare Fallow to the Total Acreage returned is 3 in every 100 acres, but it is $5\frac{3}{4}$ to every 100 acres under Corn, Green, and Rotation Grass Crops, and $7\frac{1}{2}$ to every 100 acres of Corn and Green Crops only.

There is reason for believing that in parts of Great Britain land capable of cultivation, but lying waste or untilled, is erroneously returned under the heading of "Bare Fallow or uncropped Arable Land."

The aggregate Acreage under Corn and Green Crops in the United Kingdom in 1868, as compared with 1867, shows the following results:—Corn Crops an increase of 227,000 acres, and Green Crops, exclusive of Potatoes, a decrease of 170,000 acres. The Acreage under Potatoes is larger in 1868 than in 1867 by 84,000 acres, of which 50,000 acres were in Great Britain, and 34,000 in Ireland.

The Acreage under Wheat is larger in 1868 than in 1867 in each division of the Kingdom, the total increase amounting to 310,000 acres.

The Acreage under Barley in 1868, compared with 1867, shows a falling off in England to the extent of 112,000 acres, but as there is an increase of 4,000 acres under Barley in Wales and

Scotland, and of 16,000 acres in Ireland, the actual decrease of Acreage under that Crop in the United Kingdom in 1868 amounts to 92,000 acres.

In the Acreage under Oats there is an increase in the United Kingdom of 48,000 acres in 1868 over 1867; the chief part of the increase, 40,000 acres, occurring in Ireland; England showing a decrease of 18,000, and Wales and Scotland an increase of 24,000 acres.

The Acreage under each kind of Green Crop (excepting Potatoes) is generally lower in each division of the United Kingdom in 1868 than in 1867. The decrease in the Kingdom in 1868 is 24,000 acres under Turnips, 9,000 acres under Mangolds, 12,000 acres under Cabbages, Kohl-Rabi, and Rape, and as much as 122,000 acres under Vetches, Lucerne, &c.

The Acreage under Flax in Great Britain is distinguished for the first time in the Returns for 1868. There were under that Crop 15,828 acres in England, 169 in Wales, and 1,546 in Scotland. The Acreage under Flax in Ireland in 1868 was 206,446.

A marked advance is shown in the number of Cattle and Sheep in 1868 over 1867. In the United Kingdom the total increase in Cattle amounts to 352,000. In Great Britain the increase is as much as 430,000, but there is a decrease of 82,000 in Ireland, not accounted for by an increase in the Exports of Cattle to Great Britain.

The number of Sheep in the United Kingdom is larger in 1868 than in 1867 by 1,790,000. The increase may be said to have occurred exclusively in Great Britain, the number of Sheep in Ireland showing scarcely any difference in the two years.

As regards Pigs, a kind of stock discouraged by the high prices of food, there is a decrease in the number in 1868 compared with 1867 to the extent of 1,032,000 for the United Kingdom. The chief part of the reduction is in Great Britain, where the number is less by 658,000. In Ireland there is a decrease of 371,000.

The general Tables exhibit the relative agricultural condition of the several Counties in England, Wales, and Scotland. In Table No. 3., the Per-centages of Corn Crops to the Total Acreage returned, and the proportionate number of Live Stock to every 100 acres under Crop, show variations that may be noticed with local and general interest.

The Counties may be arranged with a view to various results, but there are two groups of acknowledged importance and interest, the Grazing and Corn-growing Counties. Mr. Caird, in his published volume of Letters upon English Agriculture, gives an outline Map of England with a line of division running from north to south to distinguish the Corn and Grazing Counties. Following this plan, but with some little variation suggested by the proportion of Corn Crops to the total Acreage under cultivation as ascertained by the Agricultural Returns, the following table has been prepared to show the chief results of such a division of the English Counties.

The Counties are arranged, as far as practicable, geographically from north to south. In the two divisions the number of Counties is the same, and the total of the Acreage returned is not very different. The per-centage proportions of Corn Crops to the Total Acreage returned in each County are shown in Table No. 3., and it will be observed that in the Grazing Counties the proportion of Corn Crops is as low as 10 per cent., and not higher than 33 per cent.; but in the Corn-growing Counties the proportion of Corn Crops ranges between 33 and 55 per cent.

As regards the number of the Live Stock in the two divisions, it must be recollected that the figures relate to the Stock returned as in the possession of the Occupiers of Land and Owners of Live Stock *upon the 25th of June.*

Total Number of Cattle returned - - -	2,484,000 or 66 per cent. of Total Number in England.	1,295,000 or 34 per cent. of Total Number in England.
Total Number of Sheep returned - - -	10,638,000 or 51 per cent. of Total Number in England.	10,292,000 or 49 per cent. of Total Number in England.

An increased interest may be taken in Returns relating to the Agriculture of the country if the annual addition to the total number of consumers of food in Great Britain be considered. In round numbers, about 240,000 persons are annually added to the resident population in Great Britain. The additional Wheat supply

required for that number, at an average of six bushels per head, amounts to nearly 180,000 quarters, which, at an average English yield of 28 bushels per acre, represents the produce of upwards of 50,000 acres, and of a much larger Acreage at a lower rate of production.

Returns relating to the Crops and to the number of Live Stock in British Possessions and Foreign Countries, so far as can be obtained, will be found at the end of the Returns for Great Britain.

Later Returns than those published last year have been obligingly furnished by the Statistical Departments in the respective countries, for Sweden, Prussia, Wurtemburg, France, and some additional particulars have been supplied for Norway and Holland. The Returns recently collected in Belgium are not yet complete. Agricultural Returns have not as yet been obtained in Switzerland nor Italy; and not for a recent period in Austria, Spain, or Russia. For the United States the particulars published last year are again given, as complete returns for this year have not been at present obtained by the Agricultural Department in that country.

The information received respecting Agriculture in Foreign Countries, stated in English measures, is arranged to afford a comparison of the Agricultural Resources of this and other nations. Many international interests will be benefited when more exact comparisons can be made of the food-producing capabilities of different countries. Estimate Returns can only be considered as affording approximate results.

I have the honour to be,
My Lords,
Your Lordships most obedient Servant,
A. W. FONBLANQUE.

AGRICULTURAL STATISTICS, IRELAND,

1867.

TO HIS EXCELLENCY JAMES, MARQUESS OF ABERCORN, K.G.,
&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

I had the honour of submitting on the 14th ultimo a Return of the acreage under Flax in each County and Province in 1866 and 1867; also of the number of Scutching Mills in 1866. I now beg to submit General Abstracts which give, for the same years, the extent of land under each description of Crop; and the number of Horses, Cattle, Sheep, and Pigs.

The Emigration from Ireland during the first seven months of 1866 and 1867 is also given.

The collection of these Statistics was carried out, as in former years, by nearly 4,000 Enumerators, selected from the Constabulary and Metropolitan Police; and they have furnished Returns of the Tillage and Live Stock on the several holdings in Ireland, which amount to about 600,000. The inquiries were conducted by the officers and men employed on this duty with their usual efficiency.

The Abstracts are compiled from summaries made by the Enumerators, and may differ slightly from the *revised* figures hereafter to be published; but I do not apprehend that any important change will be necessary.

Extent under Crops.

The total acreage under all Crops in 1867 was . . .	5,458,945 acres.	
The do. do. 1866 was (*revised numbers*)	5,520,568 „	
Showing a decrease in the extent under Crops in 1867 of :	61,623 „	

The crops which *diminished* in area this year are—

The crops which *increased* in acreage in 1867 are—

		Increase. Acres.
Cereals,	Barley,	20,411
Green Crops,	Turnips,	18,513
Meadow and Clover,		57,028
Total Increase on the foregoing Crops,		95,952
Making a *Net* Decrease in the area under all Crops of		61,623

CerealCrops Compared with 1866 the area under wheat decreased by 37,282 acres, oats by 40,283 acres, bere and rye 415 acres, and beans and GreenCrops peas by 1,327 acres. Barley increased by 20,411 acres. In green crops the area under potatoes diminished by 48,808 acres, and cabbage 12,510 acres. Turnips increased by 18,513 acres.

The following Abstracts exhibit the acreage under each crop in 1866 and 1867, and the increase or decrease in the latter year:—

I beg here to repeat the observation made by me when submitting to your Excellency the General Abstracts of Tillage and Live Stock for last year:—"There is great cause for thankfulness to a merciful Providence that Ireland has hitherto been almost entirely free from the distressing ravages of the Cattle Plague by which almost every county in England and Scotland has so deeply suffered."

Scutching Mills.

Scutching Mills.

The following was the number of Mills for scutching Flax in each Province in 1866:—

Ulster,	1,393
Leinster,	49
Munster,	39
Connaught,	32
Total of Ireland,	1,513

Emigration.

Emigration.

The number of Emigrants from each Province during the first seven months of 1867, compared with the same period in 1866, is given at page 20. According to the Returns received, 54,150 persons left Ireland this year up to the 31st July, being a decrease of 20,045 on the number to the same date last year. The entire number of Emigrants since the period at which the enumeration commenced—1st May, 1851—to the 31st of July last, amounted to 1,784,339 persons.

I have again the pleasure to state that, with scarcely an exception, the particulars given in the Returns have been readily afforded to the Enumerators by the various Stockowners and Occupiers of Land, which I beg to say is highly creditable to their good feeling and intelligence; and I have now to repeat my respectful acknowledgments to the Landed Proprietors, Tenant Farmers, the Clergy of all denominations, and to the Public Press, for their continued valuable assistance with reference to the collection of these Statistics.

I have the honour to be

Your Excellency's very faithful servant,

WILLIAM DONNELLY,
Registrar-General.

N.B.—It is to be observed that the foregoing figures relate rather to grants and amounts sanctioned for expenditure than to actual expenditure incurred, and which differences no doubt, on each head of service, or in each Province, may be very considerable; but as such differences tend to compensate each other, when collected together in an aggregate form, it may therefore fairly be presumed that the grants represent the actual outlay.

* Deducting difference between sum sanctioned and amount allotted (480,583*l.*) from the Crore Fund to each Presidency; the sum restricted to public improvements, such as works of irrigation, canals, roads, bridges, and harbours, was 1,000,000*l.*
